EXAMINER'S COMMENT

Reasons for Allowance

1. Claims 1-30 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art fails to disclose or render obvious the claimed combination including modulation output-calculating means for inputting the calculated limiting value to one of a $\Delta \Sigma$ modulation algorithm and a $\Sigma \Delta$ modulation algorithm, thereby calculating a modulation output as an output from the one of the modulation algorithms; and control input-calculating means for calculating a control input to the controlled object according to the calculated modulation output, wherein said limiting value-calculating means sets the limiting value to a value which is identical in sign to the reference input and equal in absolute value to the modulation output when the absolute value of the reference input is larger than the absolute value of the modulation output, and to a value which is equal to the reference input when the absolute value of the reference input is equal to or smaller than the absolute value of the modulation output.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
